Andrew Tribone

andrew@trib.one [andrew at trib dot one]

Pragmatic software engineer and leader working to solve technology problems in the logistics industry. Currently building a Product Management organization at EasyPost. I am passionate about thoughtful software design, test driven development, and scalable infrastructures.

EasyPost

Director of Product

December 2018 - Present

Founding member of the Product Management organization at EasyPost. As our company grows, and the breadth of our customers widens, we strive to meet the needs of our customers, create scalable internal communications, and build new market-defining products. We focus on making data-driven decisions to improve our existing products and to inform the creation of future products.

Director of Engineering

January 2018 – December 2018

Day-to-day operator of the Engineering team, head of technical support, and lead application developer.

Software Engineer

February 2014 – Jan 2018

Application developer focused on infrastructure related projects, e.g. service oriented architecture, message queues, testing and software design.

Yelp

Software Engineer

January 2012 - January 2014

Application developer focused on B2B APIs for data ingestion and syndication.

University of Pittsburgh

BS, Computer Science
